DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

1st group of species: second molecule target of a bifunctional domain (claims 15 and 17) consisting of protein; 3,5,3,-triiodi-L-thyronine (T3); estradiol; tamoxifen; 4-hydroxy-tamoxifen; RU-486; and dexamethasone.

2nd group of species: phenotypes (claims 23-25) consisting of cell growth, cell cycle control, cellular physiology, cellular response to a pathogen, expression of an RNA molecule, and alteration of a transcriptional program.

3rd group of species: cell type (claims 19-22) consisting of human, plant, fungal, and bacterial cells.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, 1-14, 16, 18, and 26-30 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the

Art Unit: 1631

limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The applicants must elect one species of each of the three groups of species. The combination of elected species and generic claims will be examined on the merits subject to consideration of additional species as noted above.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
